

Geography

At Settlebeck School, our Geography curriculum is designed to ignite curiosity, foster a deep understanding of the world, and empower our students to become informed global citizens.

As our curriculum progresses, the students develop a greater knowledge about the world enabling them to deepen their understanding of the interaction between physical and human processes, and of the formation and use of landscapes and environments.

Rooted in the National Curriculum for Geography, our intent is to provide a rich and dynamic learning experience that goes beyond the acquisition of facts and figures.

Our Geography curriculum aims to:

- inspire curiosity
- develop contextual knowledge
- develop spatial awareness
- cultivate environmental awareness
- promote cultural understanding
- enhance analytical and research skills
- develop map reading skills
- encourage geographical literacy
- promote global citizenship

By delivering a challenging and inspiring Geography curriculum, we aim to prepare our students for a future where they can navigate, understand, and positively contribute to the ever-changing global landscape. Through the study of Geography at Settlebeck School, students embark on a journey of discovery that will stay with them long after they leave our doors.
